

TIERRA MADRE

REOFRESTATION AND CONSERVATION PROJECT

COME BACK TO YOUR
ROOTS, PLANT LIFE!

We are all part of this world and **Tierra Madre** has the mission to protect the **biological corridor's** area where it's located and make it a safe place for fauna and flora.

WHO ARE WE?

Tierra Madre is a reforestation and conservation project that has been fighting deforestation for over 12 years in an area of vital importance for the biodiversity of species in **Costa Rica**.

HOW YOU CAN HELP?

For every 45 euros collected we plant a tree, protect 25 square meters of jungle forever and give life to hundreds of endemic species such as sloths, pumas, jaguars or toucans!

Visit us, donate and/or share and be part of the change!
